SRC Virtual Classroom delivery

The Nokia SRC Virtual Classroom delivery method leverages a variety of tools to provide you with a quality interactive experience. Here is what you need to know before registering for a virtual class.

Technical requirements
In order to participate in a SRC virtual class, you will need to ensure that you have the following equipment:

• PC or laptop with a Web-based browser. The following operating systems and browsers are supported:
  - Windows XP Pro SP2/SP3, Vista x32/x64, Vista x32/x64 SP1/SP2, Windows 7 x32/x64 with IE 6.0 SP2, IE7, IE8, Mozilla Firefox 2.0/3.0/3.5. (Note: When not using ActiveX (IE) on Windows XP/Vista/7, JRE 1.5.0/1.6.0 or later is required.)
  - Linux kernel 2.4.20 x32 or later with Mozilla Firefox 3.0/3.5 and JRE 1.5.0/1.6.0. Linux kernel 2.6.0 x32/x64 or later with Mozilla Firefox 3.0/3.5 and JRE 1.5.0/1.6.0.
• Adobe Flash Player 10.1
• Standard telnet utility to connect to the lab environment
• Internet connection
• USB headset with noise cancelling microphone

Course and lab guide documentation
Courseware and lab guide documentation will be available for download from the virtual classroom on the first day of training.

Testing your environment
Once you register for a class, you will receive a set of instructions to complete detailed pre-testing activities in advance of the class. Completing this testing before the start of the class will help to ensure that your virtual experience is optimal.

Support
Additional inquiries regarding virtual class delivery can be sent to SRC.Registration@nokia.com.
