Nokia VoLTE Audio Gap Analysis

Improve QoE Fast

Complex correlation of multiple data sources through machine learning provides powerful insights into audio quality and user behavior.

Measure, analyse, improve & monitor

- Get rapid insights and recommendations to boost service quality
- Quickly adjust and optimize VoLTE settings
- Improve QoE with ease

Automated audio gap prediction

• Timestamp: 09:00:34.333
• Gap Length: 2.3 seconds
• Direction: Downlink
• eNB IP: 192.28.37.429
• eNB ID: 739
• GTP TEID: 12:34:AB:CD
• Handover Detected? Yes
• Band: 700
