Let Nokia Microwave Anyhaul take you to 5G – and further.

Nokia's 5G-ready Microwave Anyhaul introduces innovative, high-capacity, ultra-broadband microwave elements to support your transition to 4.5G, 4.9G, 5G and beyond. When your network requires a powerful alternative, Microwave Anyhaul delivers carriers-grade performance with little or no access to fiber networks. Instead, the air-interface in microwave spectrum represents a powerful alternative. Nokia's 5G-ready Microwave Anyhaul introduces innovative, high-capacity, ultra-broadband microwave elements to support your transition to 4.5G, 4.9G, 5G and beyond.

Streamline and innovate with Microwave Anyhaul

How Microwave Anyhaul rises to 5G challenges

- Performance highlights:
  - Ultra high capacity
  - Dynamic end-to-end service management
  - All-in-one-box

- Business:
  - How Microwave Anyhaul helps CSPs.
  - How can my company offer new services?
  - How can I protect existing revenues while creating new ones?
  - How do I handle the mix of demanding 5G and voice services?
  - How can I minimize operating costs and optimize 5G?

- Technical:
  - How Microwave Anyhaul innovates
  - How does Microwave Anyhaul enable new revenue streams?
  - How does Microwave Anyhaul meet the needs of 5G?
  - How does Microwave Anyhaul support dynamic, end-to-end service management?

Transform with Microwave Anyhaul

1. Migrate seamlessly
2. Create new revenues
3. Build the network of tomorrow
4. Go further faster

What's next for your network?

Deployed for more than 300 carriers, Nokia Microwave Anyhaul has been designed for your 5G future. Nokia's Microwave Anyhaul solution is carrier-grade, high-capacity, and optimized for 5G. Whether you are ready for the future or not, Nokia Microwave Anyhaul is fully 5G-ready and built for future network needs. With Nokia Microwave Anyhaul, you can be ready for new deployments and evolve your networks into a single network.
