Gain full site visibility with a single network for mission critical communications, broadband data, video and IoT

- Data connectivity to machinery, vehicles, staff, and IoT sensors
- Mission critical communications with Push-to-Talk and Push-to-Video
- IoT sensors monitor operational assets, environment, and workers' health and safety
- Drone networks provide aerial insight, mine surveillance and stockpile monitoring.
- Scene analytics for video feeds

Nokia Industrial-grade Private Wireless can help you prepare for the future of mining with real-time and data-driven solutions
