Deliver reliable wireless voice and data communication in narrow underground drifts and galleries.

- Enhanced collaboration and worker safety through mission-critical PTT/PTV, video monitoring, digital PPE and industrial location tracking
- Connecting thousands of devices for handheld, vehicle and machine use with greater predictability and performance under high load
- Low-latency communications for autonomous vehicles and robots
- Digitalization and automation of business-critical processes

Nokia Industrial-grade Private Wireless will help you prepare for the future of mining – above and underground
