Enhance team collaboration, worker safety and emergency response through critical person-to-person and group communications.

- One single network for all business-critical data and mission-critical voice & video communication – phasing out legacy TETRA and P25 technology
- Prioritization of emergency calls; end-to-end encryption for secure communication
- Fast call set-up times on ruggedized, certified handsets and tablets
- Share live video feeds between groups of mine workers and remote operators
- Get emergency help with a single push of a button

Nokia Industrial-grade Private Wireless will help your workers to collaborate, stay safe and quickly respond to emergency situations
